

## Bommer Pedestal Mailbox Type 3: 16 Door Not Postal Approved

[+] Larger Image

The Bommer Outdoor Pedestal mailbox has a flexible design that makes them applicable to a wide range of custom private uses as distribution and collection boxes for printed type materials, small packages, and other various items.

The pedestal mailbox has a rear hinged master door to allow access to all the compartments when loading mail. Extruded aluminum framing members and doors provide strength, resistance to corrosion, and can be powder coated for an attractive appeal.

Double wall mail compartments are fabricated of extruded and sheet aluminum. The doors are engraved 1-16 with a convertible slot in the upper left door. An optional private master lock is available to secure the rear doors when a postal lock is not used.

These mailboxes are non-returnable and have been decertified by the US Postal Service and may only be used to replace existing pedestal mailboxes of the same style if approved by your postmaster.
